Project OO.1075, "Qualitative Evaluation of Special Material as a Source"

1. A list of all Fiscal Year 1956 research by units of the Industrial Division is attached. It is possible, because of the number of projects involved, that one or two projects (particularly CSMs) were omitted.
2. The list includes, in addition, a few projects which were completed but not published for one or more reasons. These were included because it was felt that they would still be of some assistance in the second phase of this project - namely, the use of certain sources in the research process.
3. Certain projects on this list may be delayed or cancelled before the end of the research year.
